

BOC LIFELINE® AED bag

Saving minutes, saves lives

The BOC LIFELINE® bag is designed to transport all of your emergency first aid resuscitation equipment to a casualty quickly and conveniently.

The bag is designed to carry up to two CD oxygen cylinders and an Automated External Defibrillator (AED) in the expandable front pocket. There is additional space within the bag for oxygen masks and other resuscitation or first aid equipment.

Features and benefits

- All resuscitation equipment contained in one portable bag
- Can be used as a back pack or attached to separate trolley wheels for easy mobility*
- Large expandable front pocket to accommodate an AED
- Transparent windows to check cylinder content and AED status
- Large velcro strap holds oxygen cylinder securely in place
- Adjustable shoulder straps for maximum comfort

*BOC trolley wheels are available separately
